PROFESSIONAL SUMMARY

Software engineer with 15 years across startups and larger platforms (SteelSeries, TD Ameritrade, Cerner). Architecture-focused generalist who has built **backend services in NodeJS, GraphQL, Python, and Java**, including lead-routing services on AWS Lambda and highly available SaaS for message processing and routing. Automates the manual work around software delivery: cut deployments at TD Ameritrade from **8 hours of dedicated engineer time to 15 minutes of QA time**. Documentation-forward, mentorship-oriented, and recently active in local LLM tool-calling and MCP server design. Chicago-based and looking for an in-office engineering team.

CORE COMPETENCIES

Backend Services (Python, Java, NodeJS)

Message Processing and Routing

SQL and Data APIs (GraphQL)

Build and Deployment Automation

Linux / Unix, Bash, Shell

Technical Documentation

Local LLM Tool-Calling (personal projects)

Mentorship and PR Review

WORK EXPERIENCE

SteelSeries December 2018 - July 2026

Senior Frontend Developer

Chicago, Illinois

- Designed and implemented major architectural features, including a video editing suite, an Electron application and sandbox harness, and internal shared NPM libraries.
- Configured Azure build automation pipelines.
- Proactively built tools for other departments after learning about their jobs and pain points.
- Designed and maintained the internal UI component library.
- Mentored junior developers via constructive PR reviews and pair programming sessions.

Placester December 2017 - December 2018

Senior Developer

Chicago, Illinois

- Built NodeJS backend services on AWS Lambda to perform complex routing of real-estate leads to real-estate agents.
- Built GraphQL APIs tying together disparate legacy services to provide a unified data interface.
- Assisted in overhaul of legacy Backbone.js apps to Angular 6.

Fulton Works September 2016 - June 2017

Senior Developer

Chicago, Illinois

- Quickly prototyped several web-based startups on Django/Python and React, working closely with founders to create and refine products.
- Practiced Test Driven Development across client projects (Paro, AllInOrder, OfficeLuv, Grace, Pizza Hotline, White Jupiter).

TD Ameritrade

January 2016 - July 2016

Senior Developer

Chicago, Illinois

- Automated build and deployment tasks with Python, Fabric, and Jenkins, reducing deployment time from **8 hours of dedicated engineer time to 15 minutes of QA time**.

Strata

August 2014 - June 2015

Web Developer

Chicago, Illinois

- Built web-based internal data analysis tooling.

GlobalNOC

November 2012 - July 2014

Software Engineer

Bloomington, Indiana

- Built a Network Operations Center (NOC) dashboard reporting live outages and network errors, used by several major universities and US state networks.
- Maintained an array of router diagnostic software (Perl, MySQL, Jenkins).

Cerner Corporation

January 2011 - June 2012

Software Engineer

Kansas City, Missouri

- Developed highly available SaaS for message processing and routing in Java 6, Mule ESB, Spring MVC, and Maven.

PROJECTS

AI-Assisted NBA Stats

Sandbox project exploring local LLM tool-calling: a local Ollama model answers NBA questions by writing and executing SQL against a local SQLite database via Ollama's function-calling API.

TypeScript, Ollama, SQLite, Node.js

Statz on Statz

Interactive data visualization focused on NBA weekly power rankings, running since October 2015.

Data visualization

EDUCATION

M.S. Computer Science [Indiana University](#)

2010

Bloomington, Indiana

B.S. Computer Science [Earlham College](#)

2008

Richmond, Indiana

SKILLS

Languages: Python, Java, JavaScript ES6+, TypeScript, SQL, Bash, Shell, Perl, GoLang, Ruby

Platforms: Unix, NodeJS, AWS Lambda, Jenkins, Git

Frameworks: Django, Spring MVC, GraphQL, React, Electron, Jest, Model Context Protocol

Practices: CI/CD, Test Driven Development, Rapid Prototyping, Local LLM and MCP Server Design
