PROFESSIONAL SUMMARY

Senior full-stack engineer with 15 years across startups and larger platforms (SteelSeries, TD Ameritrade, Cerner). Architecture-focused generalist who has designed and shipped cloud-native full-stack features end to end -- from a video editing suite and Electron application sandbox harness through backend microservices and APIs in Node.js, GraphQL, and Python on AWS. Hands-on with LLM tool-calling and function-calling API design, and experienced translating ambiguous client and stakeholder requirements into shipped product across six concurrent engagements. Documentation-forward and mentorship-oriented.

CORE COMPETENCIES

Full-Stack Development (React, Node.js, Python)

GraphQL & RESTful APIs

AWS Lambda & Serverless

LLM Tool-Calling & Function-Calling APIs

CI/CD & Test-Driven Development

Client-Facing Delivery

Code Review & Mentorship

Electron & Cloud-Native Architecture

WORK EXPERIENCE

SteelSeries

December 2018 - July 2026

Senior Frontend Developer

Chicago, Illinois

- Designed and implemented major architectural features, including a video editing suite, a cloud-native Electron application and sandbox harness, and internal shared NPM libraries.
- Designed and maintained the internal UI component library used across the product suite.
- Proactively built tools for other departments after learning about their jobs and pain points, translating stakeholder needs into shipped solutions.
- Mentored junior developers via constructive PR reviews and pair programming sessions.

Placester

December 2017 - December 2018

Senior Developer

Chicago, Illinois

- Built Node.js backend services **on AWS (Lambda, Serverless, API Gateway)** to perform complex routing of real-estate leads to real-estate agents.
- Built GraphQL APIs on Apollo Server tying together disparate legacy services to provide a unified data interface.
- Assisted in overhaul of legacy Backbone.js apps to Angular 6.

Fulton Works

September 2016 - June 2017

Senior Developer

Chicago, Illinois

- Delivered production features across **six concurrent client engagements** (Paro, AllInOrder, OfficeLuv, Grace, Pizza Hotline, White Jupiter), translating ambiguous founder requirements into shipped product under deadline.
- Worked directly with founders as external stakeholders to scope, refine, and ship product end to end.
- Stack: React.js, Redux, JavaScript ES6, CSS3, Django, Python, Heroku, Webpack, Test-Driven Development.

TD Ameritrade

January 2016 - July 2016

Senior Developer

Chicago, Illinois

- Automated build and deployment pipeline, reducing deployment time from 8 hours of dedicated engineer time to 15 minutes of QA time.

Strata

August 2014 - June 2015

Web Developer

Chicago, Illinois

- Built web-based internal data analysis tooling using AngularJS, Bootstrap, HTML5, and CSS3.

GlobalNOC

November 2012 - July 2014

Software Engineer

Bloomington, Indiana

- Built a Network Operations Center dashboard reporting live outages and network errors, used by several major universities and US state networks.
- Maintained an array of router diagnostic software; stack included JavaScript, YUI, Perl, and MySQL.

Cerner Corporation

January 2011 - June 2012

Software Engineer

Kansas City, Missouri

- Developed highly available SaaS for message processing and routing using Java, Mule ESB, and Spring MVC.

PROJECTS

AI-Assisted NBA Stats

Sandbox project exploring local LLM tool-calling: a local Ollama model answers NBA questions by writing and executing SQL against a local SQLite database via a function-calling agent loop.

TypeScript, Ollama, SQLite, Node.js

Statz on Statz

Interactive data visualization focused on NBA weekly power rankings, running since October 2015.

JavaScript

EDUCATION

Master of Science in Computer Science [Indiana University](#)

May 2010

Bloomington, Indiana

Bachelor of Science in Computer Science [Earlham College](#)

May 2008

Richmond, Indiana

SKILLS

Languages: JavaScript ES6+, TypeScript, Python, Java, GoLang, HTML, CSS, SQL, Bash

Frameworks: React, Redux, Electron, GraphQL, Node.js, Jest, LLM Tool-Calling / Function-Calling APIs, Model Context Protocol

Platforms: AWS (Lambda, Serverless), NPM, Unix **Tools:** Webpack, Babel, Git, CI/CD, Test-Driven Development
