

# Nathan Myers

(812) 391-1530 | nathanmyers@proton.me | github.com/nathanmyers | Chicago, Illinois

## PROFESSIONAL SUMMARY

Senior full-stack engineer with 15 years across startups and larger platforms (SteelSeries, TD Ameritrade, Cerner). Backend depth in TypeScript and Node on AWS, with a track record of owning API layers end to end -- unifying disparate legacy services into single, consumable interfaces. Recently active in local LLM tooling and MCP server design, with daily hands-on experience building AI-agent tooling. Documentation-forward and automation-minded: consistently builds the checks and tooling that let a system need less of its owner over time.

## CORE COMPETENCIES

TypeScript & Node.js

API Ownership & Design

AWS (Lambda, Serverless)

AI Agent Tooling / MCP

B2B Integrations

Production Debugging

Automation

Cross-Team Delegation

## WORK EXPERIENCE

Placester December 2017 - December 2018

### Senior Developer

Chicago, Illinois

- Owned and built NodeJS backend services on AWS Lambda, handling complex, event-driven routing of real-estate leads to agents.
- Designed and built GraphQL APIs tying together disparate legacy services into a single, unified data interface consumable by other teams -- direct B2B/integration-layer experience.
- Stack: NodeJS, TypeScript, GraphQL, Apollo Server, Serverless, AWS Lambda

SteelSeries December 2018 - July 2026

### Senior Frontend Developer

Chicago, Illinois

- Owned major architecture projects end to end, including a video editing suite, an Electron application and sandbox harness, and internal shared NPM libraries.
- Designed and maintained the internal UI component library, **handing ownership to the wider team** through documentation.
- Proactively built tools for other departments after learning about their pain points -- then let those teams own the tools going forward.
- Mentored junior developers via constructive PR reviews and pair programming sessions.

TD Ameritrade January 2016 - July 2016

### Senior Developer

Chicago, Illinois

- Automated the deployment pipeline end to end, reducing deployment time from **8 hours** of dedicated engineer time to **15 minutes** of QA time -- freeing the role for other work.
- Stack: Python, Fabric, Jenkins

GlobalNOC November 2012 - July 2014

### Software Engineer

Bloomington, Indiana

- Built a Network Operations Center (NOC) dashboard reporting live outages and network errors from raw system state, used by several major universities and US state networks.

- Maintained an array of router diagnostic software.
- Stack: JavaScript, YUI, CSS3, HTML5, Perl, MySQL, Jenkins

Fulton Works

September 2016 - June 2017

Senior Developer

Chicago, Illinois

- Quickly prototyped six concurrent web-based startups for founders, owning each product from architecture through delivery.
- Stack: React.js, Redux, JavaScript ES6, Django, Python, Test Driven Development
