PROFESSIONAL SUMMARY

Senior full-stack engineer with 15 years shipping production services in Node.js on AWS, alongside React and TypeScript frontends, at startups and larger platforms (SteelSeries, TD Ameritrade, Cerner). Built highly available, event-driven backend services and GraphQL APIs on AWS Lambda, and has designed and shipped Electron applications, internal component libraries, and shared NPM libraries.

Documentation-forward and mentorship-oriented -- known for pairing, constructive PR review, and building cross-team tools after learning a department's actual pain points. Recently active in local LLM tooling and MCP server design.

CORE COMPETENCIES

Node.js on AWS

React & TypeScript

Event-Driven Architecture

GraphQL & APIs

Test-Driven Development (TDD)

Documentation-Forward Engineering

WORK EXPERIENCE

SteelSeries

December 2018 - July 2026

Senior Frontend Developer

Chicago, Illinois

- Designed and implemented major architectural features, including a video editing suite, an Electron application and sandbox harness, and internal shared NPM libraries.
- Designed and maintained the internal UI component library, with an eye toward long-term maintainability for developers encountering the codebase fresh.
- Mentored junior developers via constructive PR reviews and pair programming sessions.
- Proactively built tools for other departments after learning about their jobs and pain points.

Placester

December 2017 - December 2018

Senior Developer

Chicago, Illinois

- Built highly available NodeJS backend services on AWS Lambda, using an event-driven design to perform complex routing of real-estate leads to real-estate agents.
- Built GraphQL APIs tying together disparate legacy services to provide a unified data interface.
- Assisted in overhaul of legacy Backbone.js apps to Angular 6.

Fulton Works

September 2016 - June 2017

Senior Developer

Chicago, Illinois

- Quickly prototyped several web-based startups with React, Redux, and Django, collaborating directly with founders to create and refine products through test driven development.
- Delivered across six concurrent early-stage engagements: Paro, AllInOrder, OfficeLuv, Grace, Pizza Hotline, White Jupiter.

GlobalNOC

November 2012 - July 2014

Software Engineer

Bloomington, Indiana

- Built a Network Operations Center (NOC) dashboard on a JavaScript/MySQL stack, reporting live outages and network errors, used by several major universities and US state networks.
- Maintained an array of router diagnostic software.

Cerner Corporation

January 2011 - June 2012

Software Engineer

Kansas City, Missouri

- Developed highly available SaaS for message processing and routing using Java, Mule ESB, and Spring MVC.

PROJECTS

Statz on Statz Data Visualization

Interactive NBA weekly power-rankings data visualization, self-directed and running since October 2015.

EDUCATION

M.S. Computer Science [Indiana University](#)

2010

Bloomington, Indiana

B.S. Computer Science [Earlham College](#)

2008

Richmond, Indiana

SKILLS

Languages: JavaScript ES6+, TypeScript, Python, SQL, Ruby, HTML, CSS, GoLang **Frameworks:** React, Redux, Node.js, Electron, Jest

Platforms & Tools: AWS (Lambda), MySQL, NPM, Git, Webpack, Babel, Unix

Practices: Full Stack Development, Test-Driven Development (TDD), Documentation-Forward Engineering, CI/CD, Local LLM & MCP Server Design
